

DIGITAL ENGINEERING: BUILT A MODERN WEALTH MANAGEMENT SYSTEM TO OPTIMIZE CUSTOMER'S WEALTH

TECH STACKS:

React Native for UI

Python for backend

CLIENT:

To manage and optimize customer's wealth, the client formulates a mobile platform to build a modern wealth management system.

CHALLENGE:

To develop user interface of the mobile application (Android & iOS) based on the UI Design, API development and perform functional testing from scratch.

SOLUTION:

We used the react-native framework to develop the mobile application. Having a single code base for both iOS and android apps, we followed the agile methodology to develop and release the apps.
