

## DIGITAL ENGINEERING: DEVELOPED A ROBUST PLATFORM BY ENHANCING THE APPLICATION FOR A FUTURE-FOCUSED CLIENT

### TECH STACKS:

#### Backend

PHP 5.6 (Cake PHP Framework)

#### Data Base

MY SQL

#### Front End

Javascript

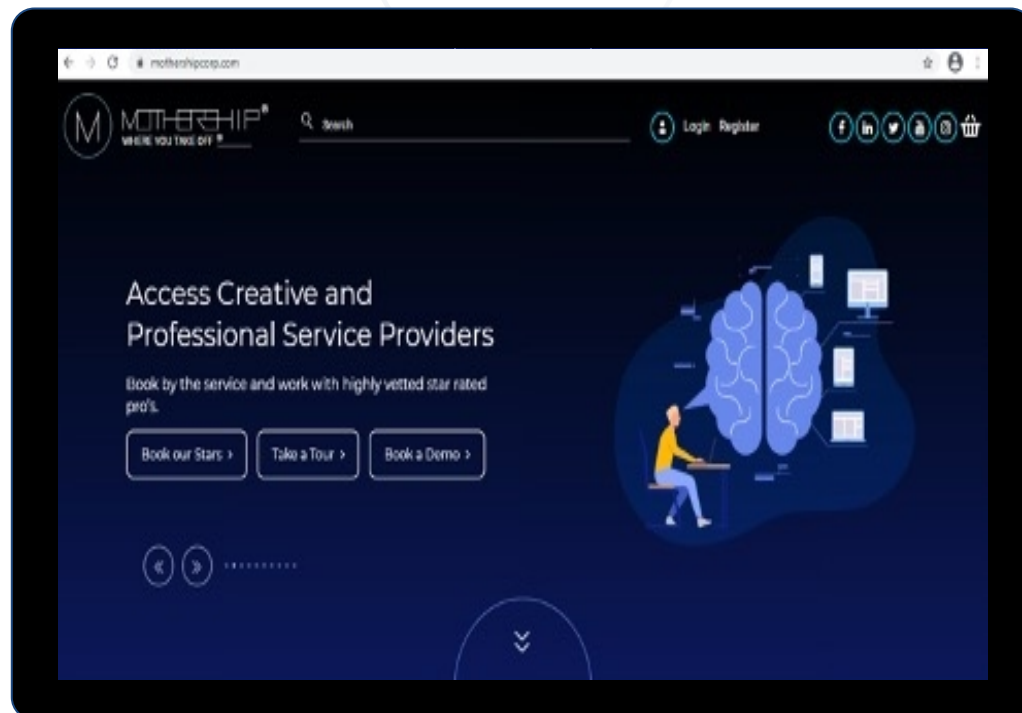

#### Front End

CSS

#### Front End

CSS

### CLIENT:

Providing a one-stop-shop for their customers by providing creative and professional services, the client specializes in outsourcing services with access to high-quality talent.

### CHALLENGE:

To develop a robust and user-friendly platform by fixing defects and enhancing the existing application

### SOLUTION:

We analyzed large amount of existing code and get control of it. Fixed the defects and connected the interlinks between features. Added payment gateway, audio & video and calendar integrations to the application.
