

DIGITAL ENGINEERING: END-TO-END MOBILE AND WEB APPLICATION TO HELP NAVIGATE AND PROVIDE MEDICAL CLAIMS ASSISTANCE

TECH STACKS:

CLIENT:

The client provides medical bill protection and cost transparency to its member community to save time, money, and stress by helping them navigate difficult medical bills.

CHALLENGE:

To resolve medical bill discrepancies and claims. To verify bill accuracy, resubmissions and credit risk.

SOLUTION:

We designed and developed an end-to-end mobile and web application to help automate the medical review process & member onboarding process. The platform is built on AWS to ensure security and high availability. A role-based access to provide privacy to the end user and an audit trail to check the bill reviews.
