

TECHNOLOGY ENABLED SERVICES: INTERCONNECTING A WORLD OF DISTINCTIVE VIDEO CONFERENCE SYSTEMS

CLIENT:

Powering global business through virtual meetings and events, the client is paving way for virtualization and video communications in top banks and finance firms.

CHALLENGE:

To oversee multi-party virtual meetings among different firms as they would frequently fail, making the experience daunting for attendees and presenters. Limited resources and tools to take care of conferences, multimedia productions and analytics along with network connectivity issues to elevate the video experience to assure problem-free video meetings.

SOLUTION:

Built a personalized roadmap for virtual conference attendees enhancing the user experience, with real-time transparency & control for conference organizers. Acute focus on quality and dedicated training frameworks were created, established and executed locally which are now part of the global training methodology. Appointed highly skilled resources with multiple skillsets globally in all time zones.
