

DIGITAL ENGINEERING: DEVELOPED A RELIABLE MOBILE APP-BASED PLATFORM FOR EVERYDAY MANAGEMENT TASKS

CLIENT:

A productivity application for restaurants to help staff grow and achieve their goals. Also help owners run their restaurants and reward their teams for their achievements.

CHALLENGE:

The client requires a mobile app-based solution focusing on admin/manager/employees' login and management tasks.

SOLUTION:

Designed and developed a platform to accommodate user onboarding & task management along with a mobile app communication architecture. We also helped with AWS setup & integration of external services like scanning SDKs, invoice generations, push notifications, etc.
