

# DIGITAL ENGINEERING: REVAMPED WEB & MOBILE APPLICATIONS FOR INCREASED PRIVACY & PERFORMANCE

## CLIENT:

A platform that enables patients to share accurate information and learn openly from one another while also allowing collaborative medical data sharing.

## CHALLENGE:

Enhance codebase for web and mobile interfaces.

## SOLUTION:

We developed product technical assessment, application security, user privacy, and performance initiatives to capture real-time health data. The product has been built on medical coding standards like MedDRA, CPT and SNOMED, LOINC, etc. We have also reconstructed app to align with actual CD/CI.
