Increasing Data Insights with API Integration

The Client

A multi-clinic DSO with multiple PMS systems required an automated approach to improve reporting efficiency and provide accurate revenue insights for leadership.

The Challenge

The client had several PMS systems, and staff were spending hours generating reports and collating information for leadership. Reporting was fragmented and inefficient.

Our Solution

Veltris developed a robust API solution that allowed the client to generate reports and send them to leadership with a click of a button.

Our Approach

- Evaluated the client's reporting needs to identify improve-
- Integrated PMS systems with Veltris's API and AI-based digital bots to ensure seamless communication.
- After integration, all patient details, claim details, and A/R information were automatically available in a centralized web portal.
- Data was updated daily, and reporting was deployed via Excel and dashboard views.

The Results

- Faster and cleaner reporting
- Increased visibility into claims and revenue cycles
- Leadership gained actionable insights instantly
- Staff spent more time on patient care and less on manual reporting

Key Benefits

- Consolidated reporting across all clinics
- Improved A/R and claims management
- Practice-by-practice comparison for leadership
- Streamlined workflows and improved profitability

About Veltris

Veltris is a Digital Product Engineering Services partner that delivers next-generation technology and industry solutions across the healthcare, technology, communications, manufacturing, and financial sectors.

Veltris enables clients to build, modernize, and monetize smarter products and platforms powered by Connected Industry AI solutions. Through an experience-centric approach, agile delivery, and differentiated talent, Veltris helps businesses optimize product development cycles, monetize platform investments, and drive transformative outcomes in niche micro industries.
