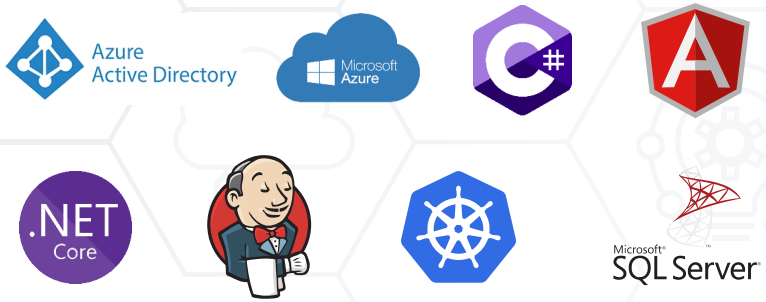
# SCALING A HIGH-VOLUME VETERINARY REPORTING PLATFORM

## TECH STACKS:



## THE CLIENT

A leading North American provider of comprehensive veterinary products, technology, and solutions dedicated to supporting animal health practices.

## THE CHALLENGE

As the client's user base expanded, their reporting platform struggled to manage high data volumes and deliver real-time insights. Slow performance, limited reporting flexibility, and significant scalability issues made it difficult for veterinarians and practice managers to make data-driven

## THE SOLUTION

Veltris led a comprehensive initiative to enhance the FUSE reporting platform, focusing on both feature development and critical performance optimization. The team designed and implemented new reporting features to meet evolving business needs and led the effort to scale the Reporting APIs, ensuring they could handle increased data volumes with minimal latency. By addressing performance bottlenecks, supporting critical architecture improvements, and driving continuous improvement, Veltris delivered a faster, more scalable, and reliable reporting infrastructure.
